Ibrahim Bassiouny, PH.D. Candidate

i.bassiony@mtc.edu.eg | +2 01556798500 | 1 December 1994

Ibrahim Bassiony | Ibrahim Bassiony | Ibrahim Bassiony

0009-0000-1640-3507 | Cairo, Egypt

Research Interests

Field of Research Artificial intelligence.

Degree Ph.D. Program.

Proposed Topic cybersecurity through cognitive AI in autonomous Systems.

Duration of Study 3 years, starting in 2027 (fully funded).

Summary I am seeking a Ph.D. in Electrical Engineering with a focus on intelligent and secure autonomous systems. Research interests include AI-driven intrusion detection, adaptive and integrated system security, and enhancing the resilience of safety-critical systems.

Education

2022 – 2024 **M.Sc., Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Egypt** in Electrical Engineering.
Malicious Behavior Detection for Safety Applications in Vehicular Network.

2013 – 2018 **B.Sc., Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Egypt** in Electrical Engineering.
Graduated with Excellent with Honor, GPA: 3.786.

Employment History

2024 – Present **Assistant Lecturer,** Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Cairo, Egypt.

2019 – 2024 **Teaching Assistant,** Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Cairo, Egypt.

Skills

Technical Tools

Programming C++, C, C#, Java, Python, Prolog, Haskell.

Software MATLAB, Jupyter notebook, Wireshark, Visual Studio development tool, Latex, Microsoft Office, SQL Server Management Studio .

Professional Skills

Languages Arabic (native), English (proficient), Mandarin Chinese (basic).

Academic Research, teaching, technical training, consultation, and scientific writing.

Administrative Examination coordination, laboratory supervision, and academic event organization.

Selected Research Experience

2020 – 2023 **COVID-19 detection using artificial intelligence** — Contributed to the development of AI-based COVID-19 detection systems, including data collection, model simulation, implementation, and integration into intelligent diagnostic frameworks.
.

Selected Subjects

Core Courses Machine Learning, Distributed Systems, Computer Graphics, Software Engineering, Computer System Architecture, Theory of Algorithms.

Systems & Embedded Microprocessors, Robotics and Embedded Systems, Introduction to Embedded Systems.

Networking & Databases Computer Communication Networks I, Computer Communication Networks II, Database Systems.

Foundations Introduction to Computer & Programming, Physics, Object Oriented Programming.

Experience

Honors & Certifications

2026 **High Competency Level in Reading and Listening to English**, Certified by ETS.

2024 **Honored Assistant Lecturer**, Certified by MTC, Cairo, Egypt.

2018 **Academic Award**, Graduated as the Top Student in Engineering Bachelor degree, MTC, Cairo, Egypt.
