Research Interests

Field of Research	Artificial Intelligence, Cybersecurity.
Degree	Ph.D. Program.
Proposed Topic	Secure and Trustworthy Autonomous Systems through AI-Driven Cybersecurity.
Duration of Study	3 years, starting in 2027.
Summary	I am seeking a Ph.D. in Electrical and Computer Engineering with a focus on secure, resilient, and trustworthy autonomous systems. My research interests include AI-driven intrusion and anomaly detection, cybersecurity for cyber-physical and autonomous systems, adaptive security mechanisms, and resilient intelligent infrastructures. I am particularly interested in the integration of AI and cybersecurity techniques to enhance the safety, reliability, and robustness of connected and autonomous systems such as autonomous vehicles, drones, and other embodied AI platforms.

Education

2022 – 2024	📖 M.Sc., Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Egypt in Electrical Engineering. <i>Malicious Behavior Detection in Vehicular Adhoc Network Using Machine Learning.</i>
2013 – 2018	📖 B.Sc., Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Egypt in Electrical Engineering. <i>Graduated with Excellent with Honor, GPA: 3.786.</i>

Employment History

2024 – Present	📖 Assistant Lecturer , Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Cairo, Egypt.
2019 – 2024	📖 Teaching Assistant , Computer Engineering and Artificial Intelligence Department, Military Technical College (MTC), Cairo, Egypt.

Skills

Technical Tools

Programming	📖 Python, C++, C, C#, Java, Prolog, and Haskell.
AI and ML	📖 Machine learning, anomaly detection, intrusion detection systems, deep learning fundamentals, intelligent systems, data analysis, and AI-driven cybersecurity applications.
Cybersecurity and Networks	📖 Network security, cyber-physical systems security, vehicular ad hoc networks (VANETs), intelligent transportation systems, traffic/network analysis, and Wireshark-based packet analysis.
Tools and Technologies	📖 PyTorch, TensorFlow, Scikit-learn, MATLAB, Jupyter Notebook, Wireshark, Visual Studio, LaTeX, Microsoft Office, SQL Server Management Studio, and Git/GitHub.

Professional Skills

Research and Academic	📖 Scientific research, technical writing, publication preparation, teaching, technical training, laboratory instruction, and academic consultation.
Analytical and Engineering	📖 Problem solving, analytical thinking, autonomous systems research, intelligent system design, and interdisciplinary collaboration.
Languages	📖 Arabic (native), English (proficient), Mandarin Chinese (basic).
Administrative	📖 Examination coordination, laboratory supervision, and academic event organization.

Selected Research Experience

2020 – 2023  **COVID-19 detection using artificial intelligence** — Contributed to the development of AI-based COVID-19 detection systems, including data collection, model simulation, implementation, and integration into intelligent diagnostic frameworks.

Selected Subjects

Core Courses	 Machine Learning, Distributed Systems, Computer Graphics, Software Engineering, Computer System Architecture, Theory of Algorithms.
Systems & Embedded	 Microprocessors, Robotics and Embedded Systems, Introduction to Embedded Systems.
Networking & Databases	 Computer Communication Networks I, Computer Communication Networks II, Database Systems.
Foundations	 Introduction to Computer & Programming, Physics, Object Oriented Programming.

Experience

Honors & Certifications

2026 **High Competency Level in Reading and Listening to English**, Certified by ETS.

2024 **Honored Assistant Lecturer**, Certified by MTC, Cairo, Egypt.

2018 **Academic Award**, Graduated as the Top Student in Engineering Bachelor degree, MTC, Cairo, Egypt.
